NOW HIRING!

Sr. Marine Electrical Engineer

It's an exciting time to be in the marine business and Elliott Bay Design Group (EBDG) is seeking a qualified marine electrical engineer to join its team of professionals. The ideal candidate will have a degree in Naval Architecture, Mechanical Engineering and/or Electrical Engineering. Position requirements include:

- 10+ years experience in marine electrical engineering
- Current knowledge of USCG regulations as well as class society rules (ABS, DnV, Lloyds, etc)
- Skilled in development of marine system designs for power, propulsion, communications, navigation, alarm and monitoring, lighting, auxiliaries, and other ship systems for various types vessels
- Should be able to perform calculations associated with marine systems, including Electrical Load Analysis, Cable Voltage Drop, Electrical Fault Analysis, etc, using spreadsheets or commercial software developed for the purpose
- Professional engineer status is required

Preferred candidates will have at least two years of on-board ship operating experience and/or experience in a shipyard providing production engineering. Experience using design software and AutoCAD are desired but not mandatory, provided you are willing and interested in acquiring these skills.

Work will primarily be in an office environment (5 days per week typically) with occasional travel for client and project meetings, inspections, and testing. The successful candidate will have excellent writing and oral communication skills and will be able to work both independently and with a team.

Proof of eligibility to work in the U.S.A. is a requirement. No second party referrals or contact, please.

This is a permanent position at EBDG. You will be working closely with a team of experienced naval architects, marine engineers, and marine designers.

Along with competitive salary, EBDG offers a variety of benefits including medical, vision, 401(k), sick leave, holidays and vacation. We believe that investing in our employees is paramount, so we offer training and mentoring programs to support our staff's goals and objectives. As an employee-owned company, future ownership opportunities may be available.

EBDG's Seattle office is located in the dynamic Ballard neighborhood and comes with plenty of FREE parking. We are also pleased to announce that we are in the process of re-opening our office in New Orleans. And did we mention that every Friday is treat day?

Elliott Bay Design Group LLC is an equal opportunity employer committed to a culturally diverse workforce. M/F/D/V. Send resumes in confidence to info@ebdg.com.

ABOUT ELLIOTT BAY DESIGN GROUP

Elliott Bay Design Group is an employee-owned firm providing unparalleled naval architecture, marine engineering, and production support services on behalf of owners, operators, and shipyards across the country.

Are all naval architecture firms alike? Not if you've got a complex project that needs to be optimized for both construction and operations. It takes a special group of professionals to understand the issues involved in both ship building and ship operations, and create a design that harmonizes the two. That's what EBDG does best. We create accurate, realistic and creative designs that move as smoothly as possible from idea to design to shipyard to service. And while our engineers and designers are second to none, we know that's not enough to achieve your goals: responsiveness and a team approach are the added ingredients that make solving the hardest challenges possible.
